

Circuit Diagram:
Three Phase AC Induction Motor Based Model Connection Diagram

2000

EXP. NO. 1-15

Aim: To study the function of 3-phase induction motor drive systems in E-mobility.

1. 150W Three phase induction motor INDS

- ### Procedure:-

- Result 1:** Thus, the test on three phase induction motor drive system in E-mobility is successful.

Teacher's Signature _____

Observation:-

$$\text{Slip \%} = \frac{N_s - N_r}{N_s} \times 100$$

S.No.	Frequency (f)	Output Voltage (V)	Ratio $= \frac{V}{f}$	RPM Calculated (Ns=120 f/p)	Nr Technometer (Rotor) RPM	Slip %
1.	6.20	30	4.84	186	177.8	4.41 %
2.	14.55	65	4.47	436	431.8	0.96 %
3.	23.35	104	4.45	700	693.0	1.00 %
4.	30.82	136	4.41	924	917.0	0.76 %
5.	42.03	185	4.40	1260	1255	0.40 %
6.	45.99	203	4.41	1379	1371	0.58 %

Result:- Thus, the test on three phase induction motor drive system in Electric Vehicle Applications/E-Mobility is performed Successfully.
